The most common type of injury to a player can be a ruptured Achilles tendon. To improve your foot position, you'll need to stretch the Achilles tendon while doing the ball drop. This can be done from a wide stance, or with your legs spread apart on a ball drop. This exercise will stretch the Achilles tendon and the Achilles tendon itself, which is very important. The more the tightness, the bigger the pain.. 2. Lay your other foot flat on the ball. Put your left foot on the ball and reach forward.. Pew Global. 2006. Global Land Cover. 2nd Edition.
