Excel For Mac Qty In Legend

If we place the cursor on the legend keys it will pop up the message Click on the symbol on the top right-hand side of the chart.. Under the border option select the Solid Line then it will create a border for the Legend.. If we want to overlap the legend on the chart then click on the More options available on the Legend.. At the bottom of the Format legend Show the legend without overlapping the chart option is available with a tick mark.. If we observe, A and B are representing two different colors and the bars are also representing the same color for 2011,2012 and 2013.

Instead of color, we can also select Gradient fill, Pattern fill, and picture Here we discuss how to add, remove and change the position of legends in an Excel chart along with practical examples and downloadable excel template.. As we want to change the series name to XYZ, change the name to XYZ and then click on OK.. By closing this banner, scrolling this page, clicking a link or continuing to browse otherwise, you agree to our Privacy Policy.. By default, it may show in the bottom or right side of the chart The data in a chart is organized with the combination of Series and Categories.. Select the chart and choose filter then will see the categories and series Consider a small table which represents the sales of A and B for the year 2011, 2012 and 2013.
